

FORGED 735•CM™

A BLENDED IRON SET FOR THE SKILLED PLAYER SEEKING THE IDEAL COMBINATION OF SHOT CONTROL, MANEUVERABILITY AND PLAYABILITY

FEATURES & BENEFITS

PROGRESSIVE DESIGN

Designed as a seamlessly blended set, Titleist® Forged 735•CM irons have continuity in performance and aesthetics for a fluid transition from long to short irons. Progressive blade heights, blade lengths, offset, topline, center of gravity and moment of inertia allow each club to perform to Tour level standards, no matter what shot is required.

CAVITY BACK LONG IRONS

Cavity back 2, 3 and 4 irons produce easy-up launch conditions for a high, penetrating ball flight with greater playability and forgiveness.

SHALLOW CAVITY MID IRONS

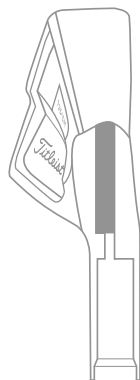

Shallow cavity mid irons deliver the ideal blend of maneuverability and playability required to access tough pin locations.

MUSCLE BACK SHORT IRONS

Muscle back short irons offer skilled players precise trajectory, spin and shot control into and around the greens.

MODIFIED BORE-THRU

Titleist Forged 735•CM irons feature a modified bore-thru design that removes non-essential mass from the hosel and repositions it directly behind the hitting area. This creates the optimal center of gravity for a solid feel and consistent launch conditions.

FLIGHTED TRAJECTORY

With a progressive design, Titleist Forged 735•CM irons provide a flighted trajectory for the ideal combination of shot control, maneuverability and playability demanded by skilled players.

SOFT, FORGED CONSTRUCTION

Titleist 735•CM irons are forged for the soft feel and sound preferred by better golfers. A six step, precision forging process guarantees consistent head shapes, dimensions and weights through the set.

CNC MILLED TO EXACTING SPECS

State-of-the-art, CNC equipment mills each Titleist Forged 735•CM iron head to exacting tolerances for proper face flatness and groove geometry. This level of craftsmanship provides extreme accuracy of lie, loft, hosel and scoreline specifications.

ONE DESIGN, TWO ALLOYS

Titleist 735•CM irons are available in two Tour proven alloys — chrome plated, forged mild carbon steel and forged stainless steel. These two alloys provide subtle feel and appearance differences, with forged stainless steel offering a wider range of custom fitting options.

GET SERIOUS. GET FIT.

Titleist Forged 735•CM irons can be custom fit to optimize ball flight and performance.

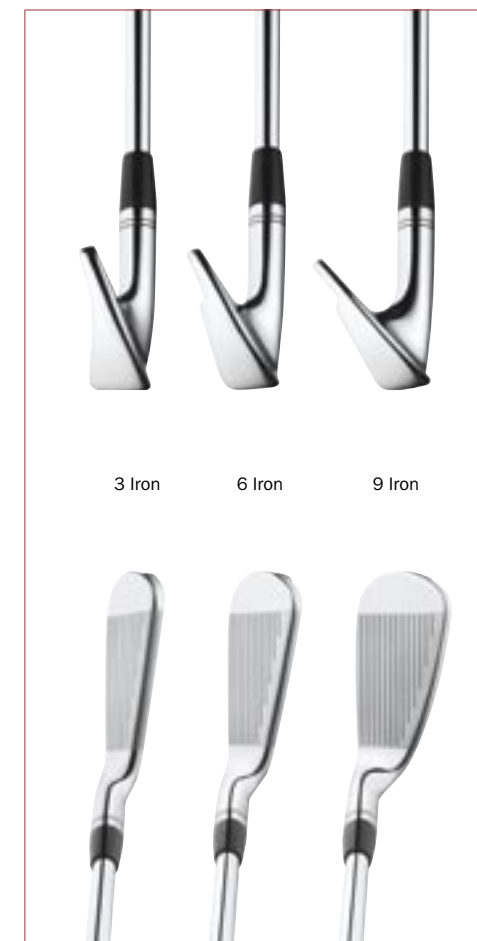

Spec	Chrome	Stainless
Length	+1.5" / -0.5"	+2" / -1"
Lie	+2° / -2°	+4° / -4°
Loft	+1° / -1°	+2° / -2°

CHROME

Forged 1025 mild carbon steel, the primary choice on the PGA Tour, provides a soft, solid feel with a traditional bright chrome plated finish for a classic appearance.

STAINLESS

Forged 410 stainless steel provides a soft, solid feel with a non-glare satin finish for a confidence-inspiring appearance and a wider range of custom options.

Stock Shaft	Flex	Torque	Weight	Spec	2	3	4	5	6	7	8	9	P
